How to Obtain an Accurate Quote

Cosmetic Surgery

To provide you with an accurate quote for cosmetic surgery, we require clear photographs of the area(s) you wish to have corrected. Please also request a Medical Assessment Form from Jackie Brown — this comprehensive form covers your full medical history and, together with your photographs, will be forwarded to the relevant cosmetic surgeon for review. The surgeon will carefully assess your images and medical history before providing a personalised quote and treatment recommendation.

Orthopaedic Surgery

For orthopaedic procedures, we require your current X-rays and/or CT scans of the relevant joint(s). These, along with your completed Medical Assessment Form detailing your medical history, will be sent to the appropriate orthopaedic surgeon for assessment. The surgeon will review your imaging and medical background to provide you with a thorough and accurate quote.

To request your Medical Assessment Form, please email: info@jbtg.co.nz

Sinus Lift / Per Quadrant	\$385
Bone Graft	\$385
Teeth Whitening	\$350

How to Obtain an Accurate Dental Quote

To provide you with a precise dental quote, we kindly ask that you forward the following to Jackie Brown at info@jbtdg.co.nz:

- Current X-rays and/or a CBCT scan (cone beam CT) of the relevant area
- A treatment plan or written recommendation from your New Zealand dentist, if available

Your scans and X-rays will be reviewed by our partner maxillofacial dental surgeons — specialists in the diagnosis and surgical treatment of conditions affecting the mouth, jaw, face, and neck, with advanced expertise in dental implants, corrective jaw surgery, and complex oral reconstruction.

Once your case has been assessed, an online consultation can be arranged so you can speak directly with your dental surgeon — giving you the opportunity to ask questions, discuss your treatment options, and feel fully confident before making any decisions.

To get started, please email: info@jbtdg.co.nz
